

The Innohearth EFF

An electric fireplace featuring the traditional look of a masonry fireplace, with a large viewing area in a small, easy to install package. Simply set the unit along your wall and plug it in. The compact EFF also makes a nice corner fireplace that extends only 24" from the corner! You can also add your own mantle to give the unit a personal touch or even build the unit into the wall for a flush installation. For warm days operate the flames alone, but to warm a chilly room, activate the built-in electric heater. The EFF requires no gas hook-up, making it ideal for apartments, condos, offices, and mobile homes.

EFF Features

- **Bright, dancing flames**
- **Beautiful glowing ember bed**
- **Richly detailed logs**
- **Realistic fire brick panels**
- **Flush hearth** gives traditional masonry fireplace look
- **Optional glass doors**
- **100% efficient 5,000 BTU/hr electric heater** with quiet, air circulating blower
- **Flame and heat operate independently**
- **Controls concealed but easily accessible**
- **Optional remote available**
- **Virtually no installation costs**
- **Zero clearance to combustibles** - set the EFF right against the wall
- **Inexpensive to operate**
- **Completely emission-free**
- **Use with or without mantle**

The Innohearth Difference

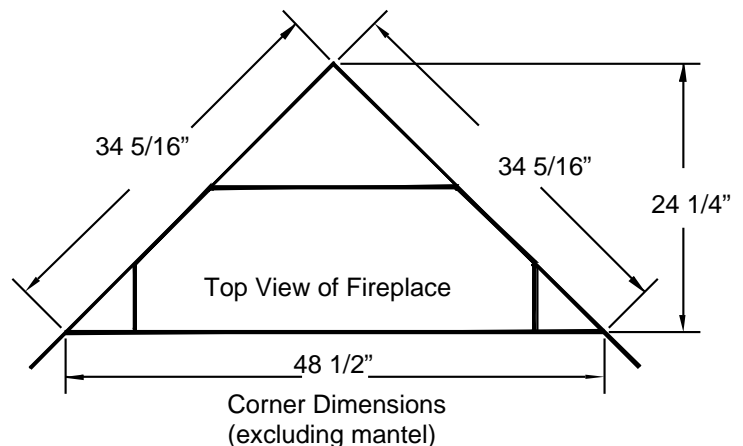

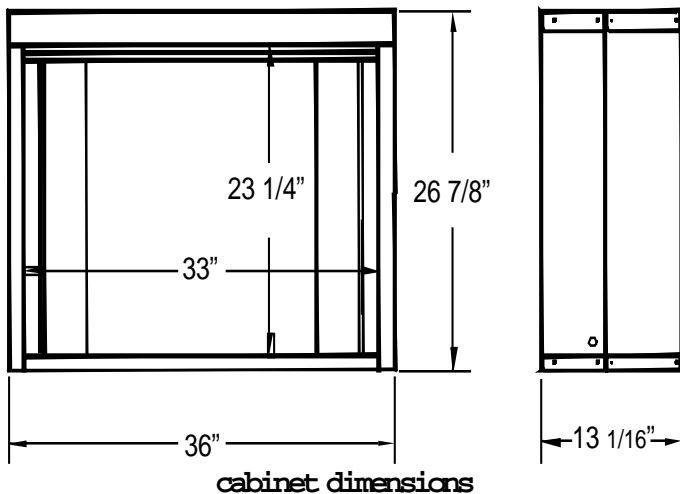

Innohearth's EFF Series features the most realistic electric flames on the market. Unlike other electric fireplaces, EFF units provide a warm, clean, and beautiful look regardless of whether the unit is on or off. This is because the EFF does not use two-way mirrors or dark reflective screens to provide its flame effect.

When the unit is on, lively dancing flame strips reflect the soft light of the logset, creating not only realistic wood-burning-like flames, but illuminating the firebox. This animated play of light and shadow on the firebox walls adds to the realism of the experience.

When the unit is turned off, the flames disappear, leaving a clean, fully detailed logset and open brick-lined firebox without the unnatural reflections from screens and mirrors.

In any lighting condition, EFF Fireplace flames are always bright and vibrant, never dim or washed-out.

The EFF Fireplace naturally imitates the relaxing pop and crackle of a real wood fire.
